# Create your own foldable templates

(2 shapes, 1 document)

- Use Microsoft Word.
- Make the outline of each shape a bold, thick line (6pt or greater)
- Make your large center shape first.
- Create the outside flaps to size.
  - Copy and paste to complete the shape all the way around.
- You do not need to fill in any information.

The template should be the as large as possible on one page. Here are a few examples below:

 ← 5 equal size squares around a pentagon.

 ←- 4 equal size triangles around a square.

Save and submit!
